

I feel that as a ham operator that the code test should be dropped as it is being dropped world wide. As a radio operator I feel it shouldnt be deleted, but left up to the descretion of the radio operator to decide if he or she wants to learn and operate code on ham radio. I share this statement with you and feel against mandatory CW testing just as hundreds of thousands of Ham operators feel here in America today. I want to thank you for your time, consideration on this matter and the chance to share my oppinions on CW testing with you. And I hope to one day soon be able to just as other countries are doing around the world, be able to operate HF without the mandatory CW testing.

sincerely

Billy R. Fuller
